Customs tariff number:	84251900

Net weight:	15.58 kg
Gross weight:	15.58 kg

DATASHEET

RESCUE KIT PLATFORM

This 8-piece rescue set was specially developed for the rescue/self-evacuation of platforms. It consists of a LOOP SEP 40 kN for attaching to a load bearing element and a PERISROP edge protection plate to protect the rope when leading over sharp edges. The SKA ROPE CLAMP can be used to lift the casualty to unhook the fastener. The MILAN HUB AGR 2001 is supplied with 130 meters of rope and offers a wide range of applications for different rescue situations. With the help of the handwheel a casualty can be lifted to unhook his or her lanyard. The casualty can then be lowered. Included in the delivery are 3 HMS STEEL TRI carabiners. The ROPEBAG and DRYBAG can be used to safely stow all equipment.
